

## DENEb Narrow Belt Sortation System

Our Narrow Belt Sorter was designed for smooth 90° transfer of small sized materials. A series of long narrow belt are used to transfer material while the roller system delivers the required shipments to the allocated stations.

- Useful in diverting cartons and shipments on either sides of the system
- Helpful in transferring load to a 90° branched conveyor system or simple ducts
- Useful in internal transfer of materials
- Capable of handling a variety of packages like boxes, totes, polybags with varying dimensions and weights

Narrow belt sorter	DENEb-NB Series
Item Types	cartons, flexible packaging, envelopes flat pieces, woven bags
Diverting angle	90 degree (both side)
Throughput	6000PPH
Loading size	150x5x3 to 1000x800x600 mm
Max weight	20 kg
Conveyor running speed	1.5m/sec
