INTRODUCTION

Incorporated in the year 1998, we, Spanco Storage Systems, are a distinguished manufacturer and supplier of storage systems. We are appreciated for features such as durability, high Performance and rigid construction. Further, our range can be customized in various sizes, shapes & designs to meet the client's specific requirements. Our commitment to quality is well known in the industry. Our enthusiastic approach and zeal for quality result is the secret of our success. The expert technicians associated with us try to incorporate the client's suggestions and feedbacks to improve on the quality standard. Client's satisfaction is the biggest reward for us.

To assure a streamline business process, we have created a robust infrastructural set up, sprawling over a large area. We carry out product designing, manufacturing, quality checking, packaging, storing and delivery processes in various specialized segments of our infrastructure. All procedures are strictly monitored by our experienced team of quality controllers.

Under the leadership of our mentor, Mr. Sanjay Virmani, we have earned a credible name in the industry. His unmatched domain experience and ethical business practices have enabled us in maintaining a healthy working environment in the industry.

• **VISION**

Excellence through technological solutions for Customer delight.

• **MISSION**

To achieve Global supremacy for our products in terms of Quality & Price.

• **ACTION**

World class research, development & manufacturing facilities. Extensive & dedicated service support.

LIGHT DUTY RACKING

SPANCO Light Duty Racks are ideal for a variety of applications including offices, Tool rooms, retail environments and storage areas. It's a cost effective, light duty bolted system, ideal for smaller or bulkier but lighter applications. It is available at a fraction of the cost of Pallet racking.

Shelves can be easily adjustable as per height required of each compartment. Shelves can be customized in a number of standard sizes and heights.

These racks are available in a plethora of sizes, finish and design to meet with the demands of different clients. Our range of slotted angle racks offers a space for storing number of items in an organized manner. With our technically advanced manufacturing unit, we use the finest quality CR and HR steel for delivering Slotted Angle Storage Systems.

MEDIUM DUTY RACKING

SPANCO Medium Duty Racking is a strong, durable, versatile and economical shelving system that minimises lost space from uprights making it suitable for a wide variety of storage application in offices, archives, libraries and retail outlets.

Strong, functional, high capacity storage, Medium Duty Racking is suited to all applications where space is a premium and can be mounted for even higher density storage.

It is fast and easy to assemble and uses a modular design that provides the maximum storage capacity, no matter what space is available. This modular configuration allows level adjustments vertically at a distance of 50mm.

HEAVY DUTY PALLET RACKING

SPANCO conventional pallet racking is generally laid out with single-entry wall racks on the perimeter sides and double-entry racks in the middle. The working aisle measurement between each rack and the rack height depends upon the characteristics of the fork-lift trucks or lifting devices, pallet size and the height of the warehouse itself.

Holding stock is an extremely complicated job especially for bulky tools such as auto parts, paper products, liquids and tires. We offer an extensive range of pallet racking system that helps in keeping the inventory well organized to maximize the storage space. These racks consist of unbroken lanes of racking with only a single load and retrieval passageway.

SPANCO Multi-Tier shelving and racking is mainly used for storage and order picking of non-palletized goods, bins, cartons or other storage units containing small parts and components and for bulk storage. The modular system accepts numerous accessories which can also be added later on. Designed to suit diverse requirements, these accessories allow storing of almost all goods.

Multi-Tier shelving and racking provides good space utilization which directly results in multiplication of the available floor space.

Stairs are an integral part of the system and material lift can be used as an option to connect the walkways on different tiers.

MODULAR MEZZANINE FLOORS

SPANCO Mezzanine Floors are fabricated, supplied and installed as per the clients demands. These floors can be made on top of heavy duty pallet racks, or just with heavy duty pillars, or with Slotted Angles.

Our range can be effortlessly relocated, enlarged or dismantled with the property of high load bearing overhead levels. The range is comes with heavy duty columns which provide stiff hold, further helping in the operation of the lower level.

These floors are easily installed in the office, storage or manufacturing areas at lesser costs, and can completely utilize the existing overhead space and gain valuable working. It is made with High quality anti corrosive materials.

CANTILEVER RACKING

SPANCO Cantilever racking is specially designed to store long or varying length items, such as metal beams, pipes, moulding, wooden boards, metal and plastic sheets among other materials. The system basically consists of columns with a vertical beam and one or two horizontal beams at the base to provide stability. A series of arms is attached on which the load is placed. Loads may be handled manually when they are light weight, or by using lift-trucks or other appropriate lifting systems when heavy items are involved.

We offers a complete range of cantilever racking systems for the storage of long goods. For loads varying from 50 to 2500 kg per cantilever arm and for most types of long goods, an optimised storage systems can be provided.

SUPERMARKET RACKING

SPANCO Display racks would serve the purpose only if the displayed items are exhibited properly. Our display racks are available in different makes and types. One such variety is our vertical display different items are displayed systematically in a vertical manner. Along with the standardized sizes these can also be customized as per the requirement of our clients.

We offer exquisitely designed Display Racks that are used to display various items in malls, stores, and other shopping areas. All metal shelving units are designed with interlocking components that fit together without nut or bolts. Clients can avail our range in different colours, sizes, and dimensions.

SPANCO Mobile Compactors are designed for use in places where there are limitations on available space. Our range of high quality mobile racks have aisles only on one side.

These high storage capacity racks that we manufacture and supply are available in two types:

- Manual (Push & Pull type)
- Mechanically operated (chain driven) system.

The choice depends on the requirements and space constraints. Our rail mounted racks are suitable for all kinds of storage requirements.

LIBRARY RACKING

SPANCO Library Racks are ideal for libraries, educational institutions, schools, colleges, universities etc. It facilitates systematic storage and easy retrieval of books. Library Racks are carefully constructed to utilize the minimum of space and books stored can be clearly seen and easily accessible.

Our Library racks are furnished with many book binds to prevent the books from falling and keep them in standing and beautiful condition.

For a continuous block, one basic section is essential while add-on section can be added to have a block of desired length, The stack can be single faced or double faced, that are operable from one side and from both sides respectively.
