

A S R S - Complete Automation

Dclutter
Automated Storage & Retrieval System

A S R S - Automated System

The Automated Storage & Retrieval system manages your warehouse well with complete storage and intra logistics. Highest output with lowest manpower. Best use of vertical space. Maximum operator safety and complies to even most stringent safety norms. The system promises Improved quality & consistency.

Functionality Highlights

Variety of Load Handling Methods

Minimal Learning Curve

Multiple Speed

Space Efficient

Easy Maintenance

Ergonomically ideal for operator interface

Why you need A S R S

- Replenishment Overload - Workers spending as much time replenishing as they are picking you're wasting time.
- Extensive Travel Time - Workers wasting time traveling several miles during a shift to access inventory.
- Excessive Search Time - On arrival at a picking destination, workers must spend time visually search for the correct item and match up part numbers.
- Rising Picking Errors - Picking errors are on the rise, wasting money and risking your company reputation
- Struggling Throughput - You are struggling to keep up with order cut-off time, or hiring seasonal workers to keep up with demand.
- Damaged Items - Valuable inventory is often found damaged and unusable.
- Misplaced Inventory - The inventory is frequently misplaced or temporarily lost.
- Pilfered Product - The inventory is often unexplainably missing.
- Facility at Max Capacity - Your building is bursting at the seams and there's no room for growth.
- Risk of Operator Injury - If workers are at risk of injury.

If You have one or more of these challenges at your Stores it is right time you go for Automation and convert your stores a future ready working environment.
