SMART SHELVING SYSTEM

# SMART SHELVING SYSTEM

The MMSpharma® Smart Shelving System is a modular and scalable solution that integrates advanced proprietary multicolour light guidance hardware (PTL) and management software for the semi-automated preparation of unit dose orders or surgical sets, when high productivity and maximum security is required (zero errors).

## FUNCTIONALITY HIGHLIGHTS

Smart solution for preparing orders/doses/treatments

Operation based on light guidance (4 colors and numerical display)

Multi-user operation (4 or 8) and simultaneous multitasking (in/out)

Improved picking productivity

Easy learning curve

## PRODUCT HIGHLIGHTS

PTL board equipped with 8 leds in 4 colors with high light beam and angle

PTL board equipped with 8 displays of 7 segments and 1 validation button

Each PTL board is independent and autonomous from the rest

PTL board with "test" function for easy fault detection

Plug & Play installation (electricity and data) and low maintenance cost

## OPERATING CYCLE
