

### Manufactures :

- Selective Pallet Racking
- Drive-in Racks
- Long Span Shelving
- Multi Tier Racking
- Mezzanine Floors
- Gravity Flow Racks
- Cantilever Racks
- Mobile Racks

# **PROGRESSIVE**

## Storage Solutions (P) Ltd.

COMPLETE INDUSTRIAL STORAGE SOLUTIONS

- More than 53 Years of Work Experience.
- More than 35 Years of Manufacturing Experience.
- Four Manufacturing Units.
- In House Conveyorised Powder Coating Plant.
- From Layout Planning..... Assembly.....to after Sales Service.

**Broad Aisle Installation :** The Standard Solution for pallet storage system is a configuration with broad aisles. Servicing is generally done with front stackers, reach trucks or man-up stacker cranes. The floor level can be conveniently serviced with a hand pallet truck or an electric lift truck. **ADVANTAGES :** Low Cost Storage, Easy retrieval by Front Stackers, Manual Order Picking at Floor Level Height, Direct Access to every Pallet, Pallets can be removed without moving or displacing others, Makes Stack Control Easy, Offers High levels of Storage Density, Automatic Stock Rotation.

## DRIVE-IN RACKING SYSTEMS (FIFO PRINCIPLE)

**The Drive-in System** allows several pallets to be stored depthwise. This System is ideal for identical goods and a period rotation of the stock is not essential. **ADVANTAGES :** High volume utilisation due to compact storage, Safe storage of pallets with unstable loads, Ideal for cold storage with predictable batch moment of pelletised loads, Can Increase storage capacity by upto 60% override aside reaching.

Long Span Shelving is designed to store non-palletised goods. Long span shelving are designed for loading and unloading goods manually. Stored goods can be from smallest components to large items.

**ADVANTAGES:** Easily Manage non uniform loads, Available in wide range of series, Access to each and every component stored on racks, Loads from 100kgs to 1000kgs per load, Low cost solutions to store small items in volume and with clear span.

**Multitier Shelving** can be adopted to double or treble your storage space. Coolplate with coloured staircases and railings. A person can go up by staircase and goods can be handled through goods lift Machines / Trolleys. In multitier shelving items can be picked by second order pickers moving on second tier. **ADVANTAGES** : Fast order processing duo to simultaneous order picking, Immediate replacement from the buffer on the top of the picking pallet, Provides clear access from all side, Varieties of detecting shelves.

The installation of **Mezzanine** is an ideal solution to maximise space by taking advantage of the height available. Customised, self supported modular structure from form sections with galvanised/powder coated deck panels as flooring with precision of stair case goods lift, chaste and railings. Standard Load carrying capacity of the floor is 500Kgs/sqft. **ADVANTAGES** : Quick to assemble, No need to go for another store or warehouse, Can be easily dissembled, reused and taken to another location, A stable new floor to hold additional storage.

Modular Mezzanine Floors

**Rack Assisted Mezzanine Floor** : In this type of Mezzanine Floor, Pallet racks are used to make compartments so that materials of different types can be stored in components for easy identification.

Rack Assisted Mezzanine Floor

**Cantilever Racks** are specially designed to store long items such as pipes, wooden parts, metal and plastic sheets, metal beams. **ADVANTAGES :**

- Ideal for goods that need to be supported on two or more arms.
- Designed to handle long and abroad loads that are not pattelised.
- Available in light and heavy duty.

Customised racks wherein load beams are initiated to facilitate flow of skills on rollers by gravity.

**ADVANTAGES :**

- Storage according to FIFO principle
- Up to 30% of space can be saved by elimination of unnecessary aisles.
- Goods stored First are First taken out.

Mobile Racks/Compactors is an ideal solution for limited space applications. It allows future expansions and investment cost are lowered compared to the cost of a new warehouse. Storage Capacity can be increased by 100% to 188% comp. depending on the system. Mobile Racks are mounted on a mobile base and driven manually by chain/sprocket. Floor spread can be reduced by 50% as gangways are converted in the storage space. Compactors are completely safe to use as every mobile compactor hold an aisle look. They are **Ideal** for Banks, Financial Institutions, Hospitals, Engineering College Office Records Documents Storage.
