

Spiral conveyor

Spiral Conveyor

- RadiForz's spiral conveyor designed for continuous conveying of items vertically between multiple floors
- High throughput at lesser footprint is the advantage of spiral conveyors
- We are offering customised single and dual track spiral conveyors to meet specific requirements
- Our dual track model made of two single spirals on a common structure with flexibility to operate in same or opposite directions depending upon the requirement. Hence dual spiral doubles the capacity at smaller footprint also saves valuable floor space
- Our spirals are made as complete modular system to suite even for existing facilities or racks.

Spiral conveyor - Key Facts

3-Dimensional belt options (width)

Single Track - 500/ 800 mm

Dual Track - 1000

Spiral radius

Single Track 500 - 1250 mm

Single Track 800 – 1750 mm

Dual Track 1000 – 1750 mm

Weight capacity

Up to 75 Kg/meter

Speed

Up to 60 m/min

Structure

Mild / Stainless steel

Features

- Sensor & PLC based automatic control and Safety features
- Integration of multi-floor infeed & outfeed lines with automated flow
