

Heavy Duty Racking System

Heavy Duty Racking System is used in various industries for Pallet storage purposes. This Palletized Racking Systems has load flexibility in terms of weight and volume. Palletize Racking System fulfils the modern warehouse material storing requirement. It is generally laid out with single-entry wall racks on the perimeter sides and double-entry racks in the middle. The working aisle measurement between each rack and the rack height depends upon the characteristics of the fork-lift trucks or lifting devices, pallet size and the height of the warehouse itself.

Holding stock is an extremely complicated job especially for bulky tools such as medicines, auto parts, food & beverages, liquids and tires etc. We offer an extensive range of pallet racking system that helps in keeping the inventory well organized to maximize the storage space.

Features

- More storage capacity on less floor space.
- Fastening structure, easy to load and unload.
- Configuration of main and add-on modules as per space availability.
- Hi-Gloss powder coat finish for excellent visibility.
- Heavy duty steel in all uprights supplied.
- Easy accessibility to individual pallets.
- Load carrying capacity up to 3000 Kgs per level.
