

Built from the Ground Up for Rapid Speed-to-Pivot

WarehouseExpert provides unmatched flexibility and configurability for your ever-changing supply chain needs

As warehousing has become more complicated, companies are facing new challenges like labor shortages, capacity crunches, inventory control issues, and many more. **WarehouseExpert™**, Made4net’s dynamic, real-time WMS helps companies like yours overcome those challenges through improved processes and better visibility.

WarehouseExpert is built on an advanced service-based architecture that enables maximum configurability through our simple rules-based platform for adaptability and scalability, providing seamless integrations, optimized labor and end-to-end visibility for real-time inventory control.

Key Capabilities:

Made4net’s core WMS product, WarehouseExpert, has been tested and approved by customers of all sizes, and recommended by leading industry consultants and analysts, including Gartner.

- Powerful core WMS functions, plus advanced WMS features
- Configurable solution that is easy to customize due to a flexible, rules-based platform, built on Microsoft technology and a service-based architecture
- Scalable to meet the needs of organizations of all sizes and complexities
- Fully integrated end-to-end solution for true supply chain convergence, including WMS, WCS, YMS, Labor, TMS and Proof of Delivery.
- Built to support multi-client (3PL) operations
- E-commerce enablement for optimized multi-channel distribution and seamless integration with technology, including voice, vision, IoT, shopping carts and carriers.

Key Benefits:

WarehouseExpert™ offers unparalleled speed-to-pivot, with our rapid deployment methodology allowing customers to see ROI faster, flexing and scaling easily to meet ever-changing customer needs.

- Maximum ROI by improving inventory accuracy
- Adaptable for changing needs
- Fit with your existing tech stack for seamless, proven integration.
- Faster Time to Value with powerful implementation tools that enable fast and low-risk delivery.
- Superior inventory control enables real-time visibility and accuracy in the warehouse and across the entire supply chain.
- Ability to perform floor operations faster by optimizing processes, personnel and MHE
- Increase customer service levels with system- directed process control and workflows to pick fast, ship fast for on-time, accurate delivery.

RoutingExpert brings a welcome Dose of common sense to Transportation software

Implementing robust transportation solutions can cut transportation costs while improving customer satisfaction

RoutingExpert™ Made4net's powerful, dynamic route planning solution, helps you optimize distribution costs and come through for your customers. Using advanced routing algorithms and unlimited flexible user-defined business constraint rules, RoutingExpert can help you plan smarter routes faster, providing a robust ROI.

Key Capabilities:

RoutingExpert's route optimization takes into account both the bottom line and customer satisfaction to plan routes that cut costs and time to delivery. The solutions parameter- and event-driven algorithms help you stay on top of transportation operations, including a fully customizable billing and payment solution.

- Optimally route orders on available fleet
- Support routing of orders, packages, pallets or routes based on value
- Optimize shipments based on cube, weights, as well as fleet size
- Meet customer-preferred delivery windows
- Build routes based on distances, speed, streets, tolls and geographical Constraints.
- Consider and plan variable service times at customer sites.
- Consider specific fleet accessibility to match customer location Constraints.
- Route orders and deliveries at any stage of the order handling process

Key Benefits:

RoutingExpert™ provides ROI through savings that could account for a significant percentage of transportation costs and improved customer service, all while still being easy to implement, flexible, and scalable.

- Save administrative costs in planning and paperwork
- Reduce fuel cost by running more efficient deliveries
- Reduce the number of trucks and cost of maintaining your fleet
- Improve customer service and satisfaction
- Reduce planning time and labor cost
- Measure KPI route planning versus execution
- Gain end-to-end visibility and control to deliver real-time optimization decisions for goods in-transit.

Real Results:

17%

Savings in Fuel

23%

Increase in efficiency of route planners

Smarter Delivery Management Keeps Customers Satisfied

DeliveryExpert™ can help manage every step of the delivery process, from scheduling to signature collection

With truck capacity issues the likes of which we've never seen and consumer expectations soaring, delivery management is more critical than ever. It's a challenge to achieve on-time deliveries that create happy customers while keeping delivery costs on-budget.

DeliveryExpert™, Made4Net's delivery management solution, has the power to help you schedule, track, verify, and collect data to improve your delivery metrics so you can strategize for efficiency.

Key Capabilities:

Made4Net's DeliveryExpert tracking and POD system has the power to simplify the delivery process, especially when deployed as a component of

Made4Net's SCEExpert™ integrated suite of products. It tracks your fleet using AVL technology, as well as automatically capturing data on what was delivered, where it was delivered, when it was delivered, and who signed for the delivery.

- Schedule shipments and deliveries, scan, load and track
- Manage drop off and pickup of shipments and packages
- Real-time fleet and product or package delivery tracking
- Eliminate paper and adopt digital signature capture in real time
- View delivery progress by route or by truck in real time dashboards
- Drill down analytics for delivery detail and signature
- Run mobile app online or offline on Android devices
- Seamless integration with all Made4net solutions for end-to-end supply chain visibility and control

Key Benefits:

DeliveryExpert provides the visibility you need to create a true end-to-end supply chain from warehouse to customer. With real-time dashboard updates, vehicle locations and AI driven ETA's. Faster and more accurate deliveries equal happier customers, and DeliveryExpert can give you both.

- Gain end-to-end visibility with real-time delivery tracking
- Eliminate paperwork by capturing customer electronic signatures in real time
- Scan and track each package or order by item, in real time
- Reduce errors
- Improve driver productivity with tasks guided on their mobile devices
- Save fuel by running more efficient deliveries
- Improve customer service and satisfaction

Real Results:

42%

increase in customer satisfaction

19%

reduction in cost of labor and paperwork

12%

savings in error reductions and customer returns

Boost Employee Efficiency to Boost Warehouse Efficiency

LaborExpert™ uses proven best practices to track performance, improve labor standards, and increase productivity

With the ongoing labor shortage, it's critical that warehouses make the most of every employee they have. To do that, companies must first understand the current state of affairs when it comes to labor performance and utilization so that they can develop effective metrics and labor standards.

LaborExpert™, Made4Net's warehouse labor standards solution, can help companies evaluate their current processes, determine how they can make those processes better, and track progress towards labor performance and utilization goals.

Key Capabilities:

Made4net's LaborExpert labor management tool goes beyond the ability to adapt to engineered standards and helps companies actually improve standards and calculate productivity goals based on key factors like available personnel, fatigue, and delay allowances. Warehouse mapping, real time dashboards, and system-calculated task times are all part of how **LaborExpert** takes labor management to the next level.

Key Benefits:

LaborExpert™ gives companies and associates alike a real time look at performance individually and as a group to provide motivation to strive towards goals. With advanced tracking features and reporting, **Made4net's** labor management solution saves time and money while improving employee engagement.

SMR Technosoft Pvt Ltd is an Indian partner to Made4Net, an Israel based software Development Company serving their client since 20years globally.

SMR Technosoft Pvt. Ltd. offers cloud-based supply chain execution and warehouse management solutions tailored to transform your business and shape its future. We are focused on delivering cutting-edge solutions to help businesses improve their warehouse management and supply chain operations.

Highly Available Solutions

At SMR Technosoft, we understand the importance of having reliable and secure solutions for businesses. We provide a comprehensive suite of services that ensure your applications are continuously available, highly scalable, and completely secured.

Powerful Scalable Solutions

We understand that businesses have different needs and we offer powerful and scalable solutions tailored to meet those specific needs. Our team of experts can help you customize your IT infrastructure to ensure it meets all your business requirements.
