IDT 87 I is our most advanced integrated reader. It contains a RFID Reader and an antenna within the same enclosure. It is designed using an Impinj Indy R2000 chip, which gives the device its impeccable performance especially in ETC applications. It has an advanced antenna design which is tailored for automatic vehicle identification applications. The reader is designed to read only in the area it is meant to read, thereby reducing all counts of crossline read and tailgating. Its waterproof design makes it the best choice for Parking Lot Management, ETC, Warehouse Management, Employee Student Tracking, Vehicle Management and others.
